GlamBox 3D Plus

A new way to "feel" the ambiance of fireplaces.

Featuring the most advanced and innovative 3D eco-friendly technology the new 3D Electric Fireplaces ensure a simple and safe use by applying an efficient operability of a water vapour release system.

The inner works of the 3D combines the latest technologies such as LEDS embedded in the decorative wood and a water vapour generator to simulate smoke. Added to a set of energy saving halogen bulbs, the system constantly regulates the intensity of the lights to the emission of the water vapour and delivers an amazing virtual flame that looks and feels remarkably realistic at any distance, a realistic aspect of real wood fireplace.

Since it utilizes simple elements such as light and water, the 3D is not only completely safe to those around it but is also environmentally friendly.

As ideal solution for public spaces the 3D has the added value of presenting itself as an eco-friendly product that does not contribute to the waste of energy nor harms the environment.

The 3D Electric Fireplaces can be integrated into virtually any environment (room, bedroom, kitchen, bathroom, etc.) or directly in different types of structures (eg.: furniture or masonry). And since the system is totally safe for its users they are increasingly becoming part of projects led by architects, decorators and interior designers.
