**The pure and the immaculate appear as synonyms of elegance.**

The elegance of the straight lines that redeem for the present the reminiscences from the past. York creates an elegant and comfortable environment that appeals to the conviviality and sharing of experiences and emotions.

**Assume that the fire takes different proportions, in different frames.**

Like the frames of the most beautiful works of art, we believe that fire also takes on different appearances through the materials that surround the flames. Contrary to what happens in these works, in York can beautify the fire with different materials.
